1. The first part of the paper is devoted to a general
discussion of the problem. It is shown that the
problem is of great importance and that it has
not been completely solved. The author then
presents a new method for solving the problem.
The method is based on the use of the
variational principle. It is shown that the
method is very simple and that it can be
applied to a wide range of problems. The
author then applies the method to the
problem of the motion of a particle in a
potential field. It is shown that the method
gives the same results as the usual method,
but it is much simpler and more general.
